

DECOPANE

decorative glass with a new view

A REVOLUTION IN DOORLIGHT TECHNOLOGY

During the past decade, nearly all decorative glass production has left North America and been sent overseas to countries with significantly lower labor rates. As transportation and fuel costs increase, the best and only opportunity for American manufacturers to retain production is with the use of automation technology and product innovation. Decopane utilizes both of these advantages to create an exciting fusion of traditional decorative glass and modern technology. Decopane gives American manufacturers a unique competitive advantage once again!

A totally new concept in the manufacture of decorative glass!

Three Options:

Decopane Film

- made from perfect CAD/CNC masters
- vacformed plastic with unlimited patterns & textures
- screen printed colors and brass, zinc, black and all new white coming
- large volume automated production effectively eliminates high labor costs

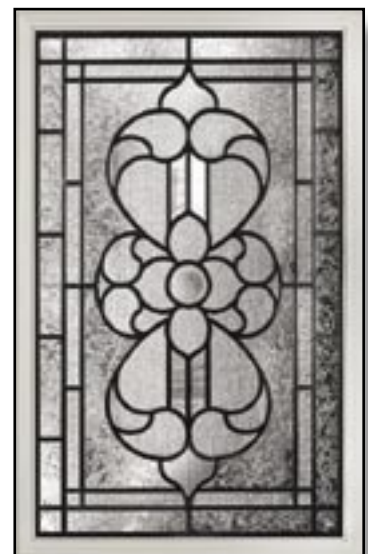

Laminated Decopane

- patent pending technology
- bonded to safety tempered glass with hi-tech polymer
- polymer tested for use in extreme cold and high heat climates
- combines beauty with breakthrough resistant technology
- dramatically reduces inventory and freight costs

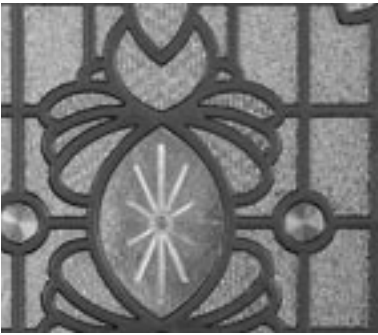

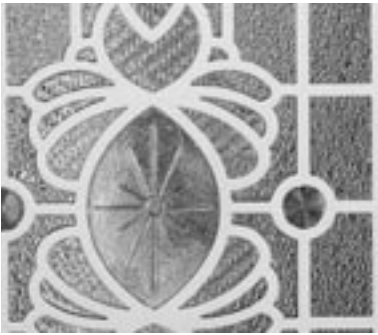

Insulated and Glazed

- 99% UV blocking for superior energy efficiency
- significantly lighter weight than traditional 1" decorative glass
- custom designs easily added to your decorative selections
- insulated and glazed into maintenance free frames for a lifetime warranty
- truly affordable at a fraction of the cost of traditional decorative doorlights
