

Bent Glass and Cracked Ice

CUPULE OF HOTEL DEL PRADO, URUGUAY

Glasslam's, innovative technology allows for unlimited flexibility in the production of laminated glass products. Using this technology, Glasslam fabricators can produce bent glass in any size and shape with assured quality.

The ability to create distortion free curved glass while still assuring safety, enables the capability to produce the following:

- S bends
- J bends
- Top Hats
- 90 Degree bends

Bent laminated glass offers the flexibility and safety ideal for use in:

- Windshields
- Stair Railings
- Solarium Windows
- Overhead Glazing

In addition, bent glass can be produced in conjunction with Sand Seal.

Cracked Ice is uniquely available to the Glasslam customer. This style is easily produced by laminating tempered glass in between two lites of annealed glass. After laminating, the center lite of tempered glass is broken. This eye pleasing product offers a customized touch of elegance to any home or office. Each piece holds its own characteristics, no two are alike, giving it a one of a kind appeal. Cracked Ice can be produced in a range of colors, again, customized to the end user's taste and preference. This product is ideal for use in tables, shelving, bars, shower doors, and many other interior decorating features.
