# AirClip™ Muntin End Clips

## AirClip™

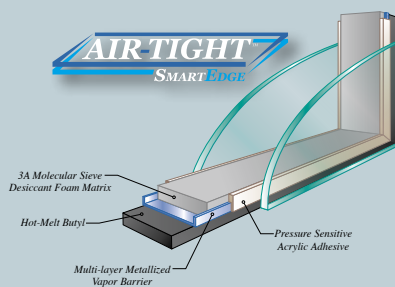

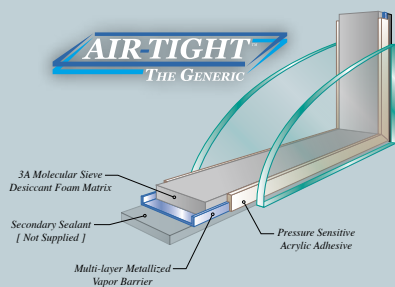

AirClip™ is the insulating glass industry's newest and most advanced muntin end clip, designed for easy installation of muntin grids to all warm-edge foam spacer systems such as Glasslam's line of Air-Tight™ spacer products and Edgetech's Super Spacer® brand products. These molded plastic clips accommodate virtually any required air space or application, providing a metal-free component for a true warm-edge muntin bar or Georgian bar unit.

- Patent pending design for efficient ease of use with all manual and automated IG unit production lines
- Precision tolerance clips that do not easily bend out of shape
- Non-Metal construction provides the ultimate in warm-edge advantage (no need to use highly conductive metal clips any more with high performance insulating foam spacers)
- AirClip™ is available in an assortment of off-set sizes and colors for all popular air space muntin grid systems
- Cost effective labor saving and cost saving muntin clip solution

Air-Tight™ and AirClip™ are trademarks of Glasslam NGL Inc.

Super Spacer® is a registered trademark of Edgetech IG Inc.
